## PRESS RELEASE

Mühldorf a. Inn, 04.04.2023

### **Product information in seconds ODU offers even easier access to 3D data**

Mühldorf a. Inn. ODU provides customers easy access to product information such as data sheets and 3D data of the connector solutions. In addition to the ODU Product Finder, an extensive partner network offers this all-round service.

The database is continuously growing and offers not only ODU circular connectors but also components for modular connectors of the ODU-MAC<sup>®</sup> Blue-Line. Integration in online libraries such as EPLAN, Zuken and CADENAS makes the data available for download as CAD/CAE formats in the shortest possible time.

#### **It works as simple as this**

ODU thus offers almost 100 different file formats, which ensures compatibility with the user's CAD software. The user loads the data of the desired product into his own programme in a few seconds. Besides saving time, the data contains useful information for the user. For example, attachment points, switching symbols, different views, technical values, classifications and article numbers.

In future, electrical information, so-called CAE formats (EPLAN or Zuken E<sup>3</sup>.series) will also be available. These are relevant for the creation of circuit diagrams, for example.

**ODU Group: global representation with perfect connections**

The ODU Group is one of the world's leading suppliers of connector systems, employing 2,600 people around the world. In addition to its company headquarters in Muehldorf a. Inn (Germany), ODU also has an international distribution network, production and product development sites in Sibiu/Romania, Shanghai/China, Tijuana/Mexico and Camarillo/USA. ODU combines all relevant areas of expertise and key technologies including design and development, machine tooling and special machine construction, injection, stamping, turning, surface technology, assembly and cable assembly. The ODU Group sells its products globally through its sales offices in Austria, China, Denmark, France, Germany, Hong Kong, Italy, Japan, Korea, Romania, Sweden, UK and the US, as well as through numerous international sales partners. ODU connectors ensure a reliable transmission of power, signals, data and media for a variety of demanding applications including medical technology, military and security, automotive, industrial electronics, and test and measurement
